REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Note that, Applicant's arguments, the Examiner's Amendment, the terminal disclaimer, and the Declaration filed under 37 CFR 1.132 are sufficient to place the instant claims in condition for allowance. Of the references of record, the most pertinent are Hage et al (US 2003/0232732) or Hage et al (US 2003/0230736). Note that, Applicant has submitted a Declaration under 37 CFR 1.132 which states that Patricia Petersen, who is listed as a co-inventor in both '732 and '736, is the same person as Patricia Veerman-Petersen, who is listed as a co-inventor in the instant application. Thus, '732 and '736 do not qualify as prior art under 35 USC 102(e) since their inventorship is not "by another" and do not qualify as prior art under any other provision of 35 USC 102.

None of the references of record, alone or in combination, teach or suggest a bleaching composition containing a monomer ligand or a transition metal catalyst thereof of the ligand, wherein the ligand is a nitrogen containing compound as recited by the instant claims. Accordingly, since the prior art of record fails to teach or suggest such a composition as recited by the instant claims, the instant claims are deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
